SCOPE OF WORK

Subcontractor scopes identified include but are not limited to the following:

Work includes bridge construction, retaining wall construction, roadway reconstruction, erosion control and protection, utility relocation of existing storm sewers, special waste excavation, earth excavation and embankment, removal of existing improvements, miscellaneous storm sewers, pavements, pavement marking and signage, roadway lighting, ITS, traffic control and protection, and urban enhancements and all incidental and collateral work necessary to complete the improvements as shown on the Plans and as described herein.

Please Note: Subcontractors will submit certified payrolls and labor compliance documentation (collectively "Certified Documentation") electronically.

This project has a goal of 15% DBE. Important: Please include current Letter of Certification with your quote. We encourage all qualified, certified, DBE firms to submit pricing for applicable subcontractor scopes. James McHugh Construction Co. is dedicated to assisting DBE firms with access to plans and specs, clarifying scopes, and identifying portions of work that are feasible.
